To Whom It May Concern,

I was the Study Team Leader of two projects wherein I had the chance to work with SRDP Consulting Inc. in the Philippines.

The first one is called the Earthquake Impact Reduction Study where SRDP provided their expertise in Geographic Information Systems and Computer Mapping. This project was funded by the Japan International Cooperation Agency (JICA) in partnership with the Metropolitan Manila Development Authority (MMDA) and Philippine Institute of Volcanology & Seismology (PHIVOLCS).

The second is called the Natural Disaster Risk Management in the Philippines sponsored by the World Bank. Again we utilized their expertise Geographic Information Systems. The works include GIS system design, editing of geographic data, primary analysis, preparation of maps, and user training.

I find SRDP technically capable and very efficient. The quality of their work meets international standards. I have observed its technical personnel exhibit speed and accuracy in their assigned tasks and I am pleased with the outputs they submitted to me.

Yours truly,

Noboru IKENISHI

Project Manager

Resource Development and Management Division

Pacific Consultants International, Tokyo, Japan
